

THE 1st INTERNATIONAL MEETING
ON THE
MANAGEMENT OF THE HIP
IN
CEREBRAL PALSY

11 MARCH 2010
ST GEORGE'S HALL, LIVERPOOL

* * * * *

This is a 'must not miss' event aimed at paediatric neurologists, community paediatricians, orthopaedic surgeons, and physiotherapists involved in the care and treatment of children with cerebral palsy.

The purpose of the meeting is to examine the evidence; inform and update clinicians; share good practice; facilitate the provision of equity of care and identify areas for further research.

Issues to be examined will include:

- What is the incidence of hip lateralisation/subluxation in cerebral palsy?
- What are the clinical problems that hip subluxation results in?
- Is hip dislocation preventable and if so by what methods?
- Are hip surveillance programmes necessary and/or beneficial and if so who should be responsible for these?
- The current state of knowledge with regard to the management of hip dislocation.

Speakers include: Prof H Kerr Graham Dr Freeman Miller MD
 Dr Gunnar Hagglund Dr Reinhold Brunner
 Mr James Robb Dr Terry Pountney

Cost: Doctors: £180.00

Therapists: £90.00
