

# Rebuilding Prosthetic & Orthotic Services Post Covid-19

## ISPO UK MS Webinar

Thursday 3 December 2020 | 4.00 pm – 6.00 pm

Chair: Carolyn Young, National Programme of Care Manager, NHSE & NHS Improvement

***Covid 19 has inflicted a devastating impact upon the delivery of healthcare services across the NHS.***

*This includes all aspects of the P & O sector with patients unable to access appropriate treatment and devices over an extended period. We now have an unprecedented backlog of patients combined with a fragmented re-emergence of P & O services across the UK. The ability to deliver services at scale has been compromised for the foreseeable future. With particular regard to Orthotic services the situation is exceptionally fragile due to inequitable funding models that are likely to prove unsustainable in the short to medium term.*

**This event aims to draw together representatives across all parties involved in P & O service delivery.**

Each session will comprise a 10 minute presentation followed by discussion and response to questions from participants who will be invited to share comments and questions via the CHAT BOX during each session. Time permitting, there will be a further opportunity for discussion and questions prior to close of event at 6 pm.
